EDUCATION

University of Birmingham

Master of Science in Advanced Computer Science

Birmingham, UK

Sept. 2023 – Sept. 2024

Visvesvaraya Technological University

Bachelor of Engineering in Computer Science and Engineering

Belagavi, IN

Aug. 2016 – Aug. 2020

EXPERIENCE

Senior Software Developer

June 2023 – Aug. 2023

Quantiphi

Bengaluru, IN

- Designed and engineered an **RDP (Remote Desktop)** service catering to **Nvidia** and **ICI** team requirements, facilitating remote machine management in geographically isolated client locations across 6 continents.
- Introduced **AWS Services** (eg. API Gateway, IOT Core, OpenSSH) and the **MEAN** Stack for the development of this solution.
- Notably, Completed the project ahead of schedule, allowing for a buffer of approximately two months for thorough multi-stage testing and any ad hoc modifications.

Full Stack Developer (Member of Technical Staff)

Apr. 2022 – May 2023

AXIO Finance

Bengaluru, IN

- Spearheaded the design and development of the **Tata Pay Later Frontend**, managing traffic due to a **large customer base**.
- Implemented significant contributions to the **UI/UX** and feature enhancements for **Amazon Pay Later/AXIO** to maximise user engagement by **20%**.
- Led the **rebranding** efforts for the Frontend during the transition from **Capital Float** to **AXIO**.

Software Engineer

July 2020 – Apr. 2022

Synamedia

Bengaluru, IN

- Created, developed, and rigorously tested an **Automatic Notice and Takedown System** aimed at identifying and addressing pirated content across OTT, DTH, and other platforms. This involved sending legal notices in stages of escalation for persistent offenders.
- Developed and tested a comprehensive product from the ground up, utilizing **MERN/MEAN Stack**.
- Developed the backend server and **REST APIs**, leveraging **NodeJS** and **ExpressJS**, while maintaining API documentation through **Swagger**.
- Employed **Docker** for containerizing full-stack applications, ensuring swift builds and cloud deployment.
- Transformed wireframes and prototypes into visually appealing and user-friendly web applications.
- Executed rigorous multi-stage testing encompassing diverse scenarios, utilizing test beds and stubs, and organized test documents within **Confluence**.
- Gathered and comprehended business requirements from clients and colleagues, proceeding to design, develop, and maintain versions and releases.

Trainee

Jan. 2020 – July. 2020

RoadMetrics

Bengaluru, IN

- Facilitated the development of a road assessment platform for government entities and city councils, resulting in a **50%** increase in customer acquisition. Played key role in creating a navigation app for individual consumers, which garnered over **1,000 downloads** and allowed users to select routes based on **optimal road conditions**.
- Designed and deployed modules in multiple technologies, including UI/UX design, microservices, and APIs, utilizing AWS Lambda, S3, RDS, Android Application Development, Tensorflow, WebStack, Python Modules, and Single Page Applications with the **MEAN** stack.
- Conducted application testing to identify and address technical problems such as **ANR** (Application Not Responding) issues and crashes.
- Assumed responsibility for release management on **Google Play Store** and the ongoing maintenance of cloud infrastructure.

PROJECTS

Orca | *Mongo DB, Express JS, React, NodeJS, AWS, Google Analytics*

- Developed a **Analytics Website** as a personal project that can identify and address pirated content across OTT, Telegram, and other social media sources.
- Generates trend graphs and other analytical metrics for users to analyse and create report.
- Implemented an experimental feature enabling the scheduling of cron jobs to send routine emails. Initially designed the email content in HTML on the server, subsequently parsing and delivering.

MedApp | *Java, Android, AWS, Firebase, GCP*

- Developed a mobile application enabling victims and nearby citizens to send emergency alarm messages swiftly.
- Implemented real-time location tracking to identify the nearest healthcare providers, including ambulances.
- Enabled notifications to be sent to nearby healthcare workers, requesting assistance during emergencies.
- Included a feature offering first aid tips for immediate support during crisis situations.

SKILLS

Languages: Java, Python, C, JavaScript, HTML5, CSS3, Typescript, XML, SCSS, LESS

Frameworks: React, Angular, ExpressJS, Node.js, MEAN, MERN, Flask, Android, Material-UI, REST API, Redux

Databases: MySQL, Oracle 11G, SQLite, MongoDB, DynamoDB, Redshift, PostgreSQL, Cassandra

Cloud: Google Cloud Platform, AWS, Firebase

Developer Tools: Docker, Kubernetes, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse

Control System, Documentations and UI Wireframing: Git, Jenkins, Jira, Confluence, Asana, Zeplin, Figma, Adobe XD, Sketch

OS: Windows, Linux(RedHat, CentOS), macOS

Miscellaneous: Public Speaking, Communication, Problem Solving, Leadershipt, Time Management, Conflict Resolution

ACHIEVEMENTS

Finalist, TechGig Code Gladiators 2021: Advanced to the final round of the event, earning a spot in the **top 100** contenders from a pool of **400,000 participants**.

Winner, Smart India Hackathon 2020: Secured victory in the Smart India Hackathon 2020 - Software Edition, emerging as the winner among more than **35,000** participating teams in the **Government of India** organized three-day hackathon.

3rd/100, Google I/O Extended AppDev Hackathon 2018: Achieved a notable **third-place** ranking among **100 teams** at the 2018 Google I/O Extended AppDev Hackathon.

HackerRank: Resolved more than **100 problems** on HackerRank across multiple programming languages, while also achieving **gold badges** through participation in competitions and practice.

CERTIFICATIONS

MERN Specialisation: Hong Kong University of Science and Technology(Coursera).

AWS Fundamentals: Coursera.

MEAN Specialisation: Udemy.

Python: University of Michigan(Coursera).
